## TRS Female to TRRS Male Microphone Adapter

### FEATURES

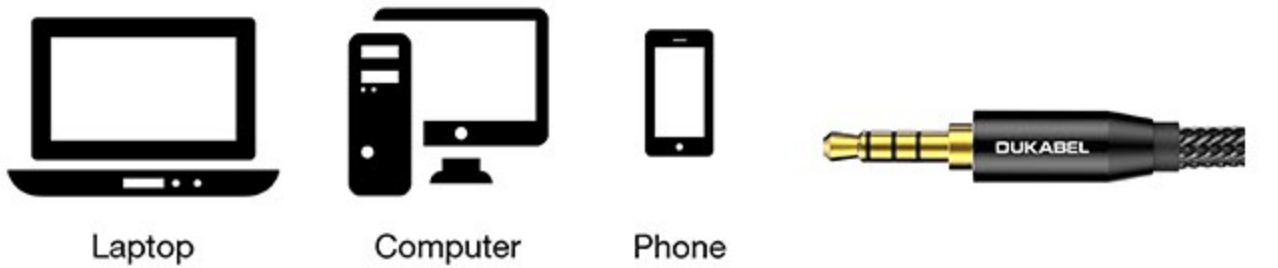

Model: DC4

Plug 1: 3.5mm TRS Female Jack

Plug 2: 3.5mm TRRS Male Plug

This microphone adapter is designed for recording, live streaming, interviewing, broadcasting

### COMPATIBILITY

Compatible with most 3.5mm-enabled recording devices with TRRS input, such as smartphones, PCs, PS4, Xbox One, Notebook.

Compatible with 3-pin TRS microphones.  
Note: Donot Work for Any 4-pin Microphones

### NOTES AND WARM TIPS DURING YOUR USE

1. The adapter is only compatible with 3 Pole TRS microphones, not compatible with TS or TRRS microphone.
2. Can only for Microphone input transmission, DO NOT Support Audio-output.
3. The TRS-TRRS adapter is only suitable for electronic microphones or battery-powered microphone, not for dynamic microphones or microphones with phantom power and symmetrical transmission.
4. Please note that the TRS to TRRS microphone converter can only support the recording devices in CTIA standard, not in OMTP standard.
5. Recommended connection method: please plug the your mics into the 3.5mm female jack first, then connect the adapter to the 3.5mm port on your devices, which can reduce electronic noise to a certain extent.
6. The results might be not alike when with different microphones. It's not due to the adapters, but happens maybe due to the different level adjustments of the microphones.
